Premier RC High Quality Professional Race Gate System

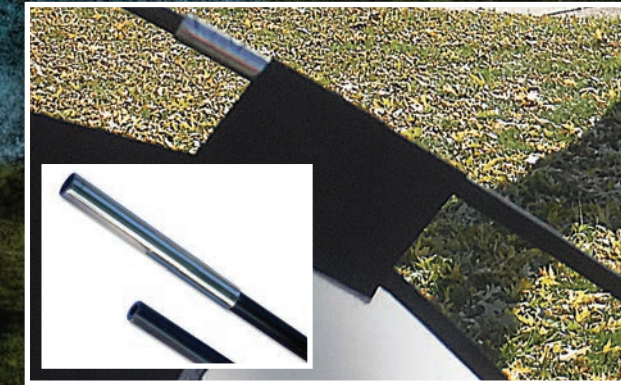

Designed by FPV racers for FPV racers. These gates are made with heavy-duty fade and prop resistant Suntex fabric that can absorb the impact and help minimize craft damage.

The framework is built to survive with extra strong fiberglass supports, durable metal ferrules, and high quality ground stakes for fast and easy setup.

www.PremierRC.com

Premier Race Gate supports are made with durable heavy wall 9.5 mm, and 12.5 mm fiberglass tubing. These durable frames are joined with heavy rust-resistant aluminum and stainless steel ferrules.

The included ground stakes, molded from ABS plastic are easy to drive into most terrain and securely keep markers and gates in place. In most cases, no extra tie-downs are needed.

Flying indoors or where stakes are impractical? No problem! PremierRC offers sturdy bases that fit all our race gate products. Lightweight and sturdy, these bases can be filled with water for rock-solid support. Easy to use "Twist and Grip" mechanism keeps all products fixed firmly into base.

Visibility, clarity, consistency and simple field setup are the hallmarks of our race gate system, allowing maximum pilot enjoyment.

PREMIER RC - Race Gates High Quality Pro Race Gate System

"As a racer and course designer, I'm always on the lookout for solid track gear to complement our race courses. I was thrilled when I found out about the Premier RC race gates... Now, with the Premier RC race gates, we have truly professional equipment that's built to last and stands out in your FPV feed."

*Thank you,
Conrad "Furadi" Miller*

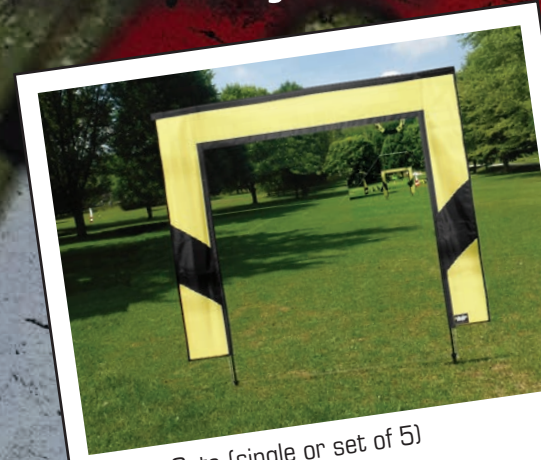

The addition of a set of Premier RC race gates to your next event adds a whole new level of flying fun for wing or quad pilots. And for those who are serious competition racers, adding a set of our gates lets you experience and duplicate the same conditions you'll run into on race day.

Each gate, marker or marker set comes with a clearly labeled high quality bag for easy identification and portability.
